Communication at the speed of light

News

Fort Cedar breaks ground

The Spectrum, Saturday, March 8, 2008

By David Demille

CEDAR CITY - This week marked another step in Cedar City's transition to more high-tech and high-pay jobs with Thursday's groundbreaking for a new commercial center, a project developers say will take advantage of the city's growing technology infrastructure and central location between Salt Lake City and Las Vegas... ([Read More](#))

City Getting Connected

The Spectrum, Thursday, January 24, 2008

By David Demille

CEDAR CITY - InterLinx Communications, a provider of cutting-edge Internet access technology, is set to begin installation of a high-speed, high-bandwidth, fiber-optic network infrastructure in Cedar City next month... ([Read More](#))

Fiber is truly tech-industry standard

Deseret Morning News, Friday, March 17, 2006

By Robert Ridge

The arguments that Jay Evensen makes in his column "Cities finding getting wired pricey, passe" published on March 5 appear to be based on little more than a couple of hours of Web browsing. To argue that Provo ought to look to a "free" wireless network to support its future communication infrastructure is to reveal Mr. Evensen's lack of technical expertise in the area of high-speed data network systems. ([Read More](#))

Utah InterLinx Finds the Visibility They Need with the T/Mon SLIM

DPS Telecom - PROTOCOL Alarm Monitoring Ezine - 14 March 2006

For Utah InterLinx, a Competitive Access Provider in a rural market, an affordable network monitoring solution seemed hard to find. Most of the products they looked at just didn't address the needs of a smaller network and the ones that did failed to offer the level of visibility they were seeking. Then they found the T/Mon SLIM. ([Read More](#))

InfoWest and Utah InterLinx - What's the Connection?

General Broadband, Randy - 28 February 2006

I was recently asked by a customer, "so how are you guys connected with Interlinx?" As I tried to explain the big picture, it became obvious that I should spend some time to spell out what our business and technical connections are, and why they matter. Here's my first attempt - I welcome any questions... ([Read More](#))

St George Chamber of Commerce - 25 Feb 2006

Special Recognition Award for 2005 presented to Gene Morris, Lowry Snow, Warren Stringham, Chris Chandler, and Kay Traveller - InterLinx

Scott Hirschi - Washington County Economic Development Director -

"For Utah InterLinx to take the business chance that they did, to invest all that time and money on a wing and a prayer to make this come together, was a gutsy decision. Their actions have resolved 98 percent of the telecommunications redundancy challenge that we faced in Washington County..." ([Read More](#))

Gene Morris - President

Groundbreaking Ceremony
